"@KG_Coding Sir, I have completed the course up to 7:20:00, but I still don't
feel confident enough to build even simple projects. Please, sir, could you give
me some tips on improving my logic and building confidence in the things I've
learned? I want to learn how to utilize these skills when making projects
because I am in my final year of college, and I need to secure a job. This is an
urgent request—please help me. I've been struggling to learn these
technologies for the last eight months, but nothing has worked so far.
Although my basics are almost clear, I get stuck when it comes to building my
own projects, and then I have to rely on help from the internet or ChatGPT.
Before this course, I completed a React course from another channel, but I
couldn't understand the concepts properly. However, on your channel, I
understand the concepts very well because your explanations are very clear. I
started learning React in June or July, but I still haven't reached the expected
level. I am also afraid because I am in a Tier 3 college, and there are no

campus placements available.
Please, sir, help me. 🙏🙏🙏🙏🙏🙏🙏🙏", "textOriginal": "@KG_Coding Sir, I have completed the course up to 7:20:00, but I still don't feel confident enough to build even simple projects.
